

### **Feline Rabbit and Potato Based Diet**

#### **Ingredients**

Cooked Rabbit Meat	300g (2 ¼ cups)
Boiled Potatoes	400g (2 cups)
Calcium Carbonate (ground egg shell or Tums)	½ teaspoon
VMD-Feline Premix (plus Taurine)	1 teaspoon
Corn Oil	

**Recipe Directions:** This recipe will yield approximately 724g of product (206g dry matter) with an energy content of approximately 800 Kcal (1.1 Kcal/g). The average 10 lb cat should receive approximately 1/3 of this amount per day divided into 2 equal portions or meals per day. The VMD premix contains taurine equivalent to 1000 mg/kg on a dry matter basis. The diet is a low ash (approx. 5%) and a low magnesium (<0.1% dry matter) food.
